I couldn't help thinking about the fact that both Lightroom and Photoshop get crowded into the menu bar when they could be easily kept together in the Windows taskbar as a single piece of multi-window software. The roadmap for the upcoming future of PaintShop PRO is clear. While some versions have been pared down from their former selves, the focus of the software remains focused on its traditional strengths. If you're a pro-photo type, you'll probably agree with me that Photoshop is still the best that there is in terms of image editing. It's the tool for rendering beautiful images and drafting designs. No matter how many other apps come out there, photoshop will remain one of the gaming favorites.
